The child, it was charged, died of cholera, and Hume was charged with the benefit of medical skill. Rumors were speedily circulated in the neighborhood, that the child had been killed by a blow on the head, administered by a prisoner, who, while intoxicated, as set forth, knocked his wife down when she had the child in her arms. Other rumors were spread to the effect that the mother of the deceased, who is said to be of dissipated habits, got drunk and fell on the child. The rumors were so persistent and so annoying, the prisoner was locked up to await the result of an investigation by the coroner.

The amount paid to the convicts is \$45,234, \$30,000 of which has been paid to the State Treasurer. The expenses of erecting a new house and that of some general repairs has been liquidated from the sum of \$1,000. From the appropriations to the State Prison were \$226,000, besides an annual appropriation, authorized since 1845, of \$10,000. From April 1869, to the present time, the sum of \$1,000,000 has been expended in the purchase of convicts having been \$133,000, which shows a saving to the State, as compared with the cost of maintaining them.
